Sole Source Justification Request

Definition of a Sole Source Purchase

Sole Source Item – goods and/or services which can only be obtained from ONLY ONE source, including:

- Items for which competition is precluded because of the existence of patents, copyrights, secret processes, or monopolies
- Films, manuscripts, or books
- Electric power, gas, water, and other utility services,
- Captive replacement parts or components for equipment which there is no commercially available substitute, and which can be obtained only from the manufacturer and/or manufacturer’s distributor; item where compatibility is the overriding consideration, such as computer operating software enhancements for an existing system, continuation of an existing contract when work is so closely related to that of the uncompleted basic contract that it would not be feasible to consider another potential contractor.

This Sole Source justification requires additional documentation and requirements as listed below. One of these steps may require placing a public notice in BidSync for 14 days, in order to allow any possible competitors to come forward with equivalent goods or services. This step will be completed by the Purchasing Team that supports your office or county department after all required documents have been submitted. In addition, all Sole Source Justifications must be approved in Commissioners Court.

Required Documentation that must accompany this request before this purchase can be considered (any missing documentation will result in delays). Check all included documents:

- This request form completed and signed
- A written quote from the supplier, listing the goods, services and pricing
- Letter of justification from the supplier (on company letterhead and signed by an authorized representative) establishing why they are the only Sole Source provider of the service or item needed.
- Notarized Sole Source affidavit completed by the supplier
- Signed letter of recommendation from the Elected Official or County Department Head. Must provide a detailed written explanation as to why competitively bidding the product or service would be impracticable and that the cost charged by the supplier is reasonable and customary.

NOTE: After a passage of time, an item or service may no longer qualify as a sole source purchase due to other similar items or services becoming available from other suppliers. Thus, all prior sole source determinations must be reapproved by the Williamson County Purchasing Department following completion of a new Sole Source Justification Request Process and satisfactory completion of such process must be noted on requisitions and purchase orders. The sole source term is generally aligned with the contract term. In certain cases, the Purchasing Agent may determine that the 14-day public posting in BidSync is not necessary. This depends on the circumstance of the particular item/service and the type of sole source.

My Commission expires on 07-16-2023
To: Williamson County Purchasing  
From: Sheriff Robert Chody  
Subject: Sole Source Purchase of Pen-Link  
Date: May 28, 2020

I support the purchase of the Pen-Link PLX and Pen Point programs for use in the Criminal Investigations Division (CID). Technology is ever evolving with criminals utilizing technology to elude law enforcement. It is imperative that our investigators are provided the tools necessary to not only access and analyze electronic storage devices but also to have the tools necessary to track and locate people committing crimes.  
Pen-Link is a sole sourced program being used by many federal law enforcement agencies to analyze large volumes of data to link criminal organizations together and analyze the data to help detectives secure successful prosecution of cases.  
The program is an all-inclusive analysis tool to combine data from all types of communication devices to collect email and other Internet communication data, analyze and export large volumes of social media. The program includes charting tools to identify data links, frequencies, timelines, and call associations using an array of charting tools. The program can load large quantities of files from an array of file types and sources.  
The data and content collected from judicially authorized pen register and Title III cases can be monitored in real time for analysis and reporting as well as being able to create custom reports from one or more data sets.  
The cell mapping feature uses global positioning to plot cell site usage and ping coordinates in real time. The program manages target alerts and get access to historic and live collection locations enabling location histories and predict future movements with customizable mapping features. Real-time lat/long notifications for new calls and pings will be enable investigators to rapidly respond to locations they need to be with the use of the in-app navigation to locate a targets most recent location.  
This technology will be an asset to the Criminal Investigations Division to both help solve crime as well as prevent future crime by analyzing criminal behavior. There isn’t another company providing this technology for law enforcement therefore the competitive bidding process would not be feasible.
