UTILITY INSTALLATION REQUEST

DATE September 22, 1997
TO Williamson County Commissioners' Court c/o County Engineer or County Commissioner

Formal notice is hereby given that Central Telephone Company of Texas proposes to place a buried communication line within the right-of-way of Ramms Drive as follows

Beginning approximately 120 feet west of the intersection of CR 228 & Ramms Dr continuing in the north right-of-way for 120 feet then continuing in the west right-of-way for approximately 720 feet at a depth of 30 inches and at a distance of 4 feet from the rear of the right-of-way then continuing to backhoe at a depth of 36 inches for 90 feet then continuing at a depth of 30 inches for 550 feet.

The location and description of the proposed line and appurtenances is more fully shown on the drawing attached hereto. The line will be constructed & maintained on the County right-of-way in accordance with current Williamson County Specifications as directed by the County Engineer or County Commissioner.

Construction will begin on or after the 3rd day of October, 1997, and is estimated to be completed in 2 calendar days.

APPROVAL

The application is hereby approved subject to the following understandings and restrictions:

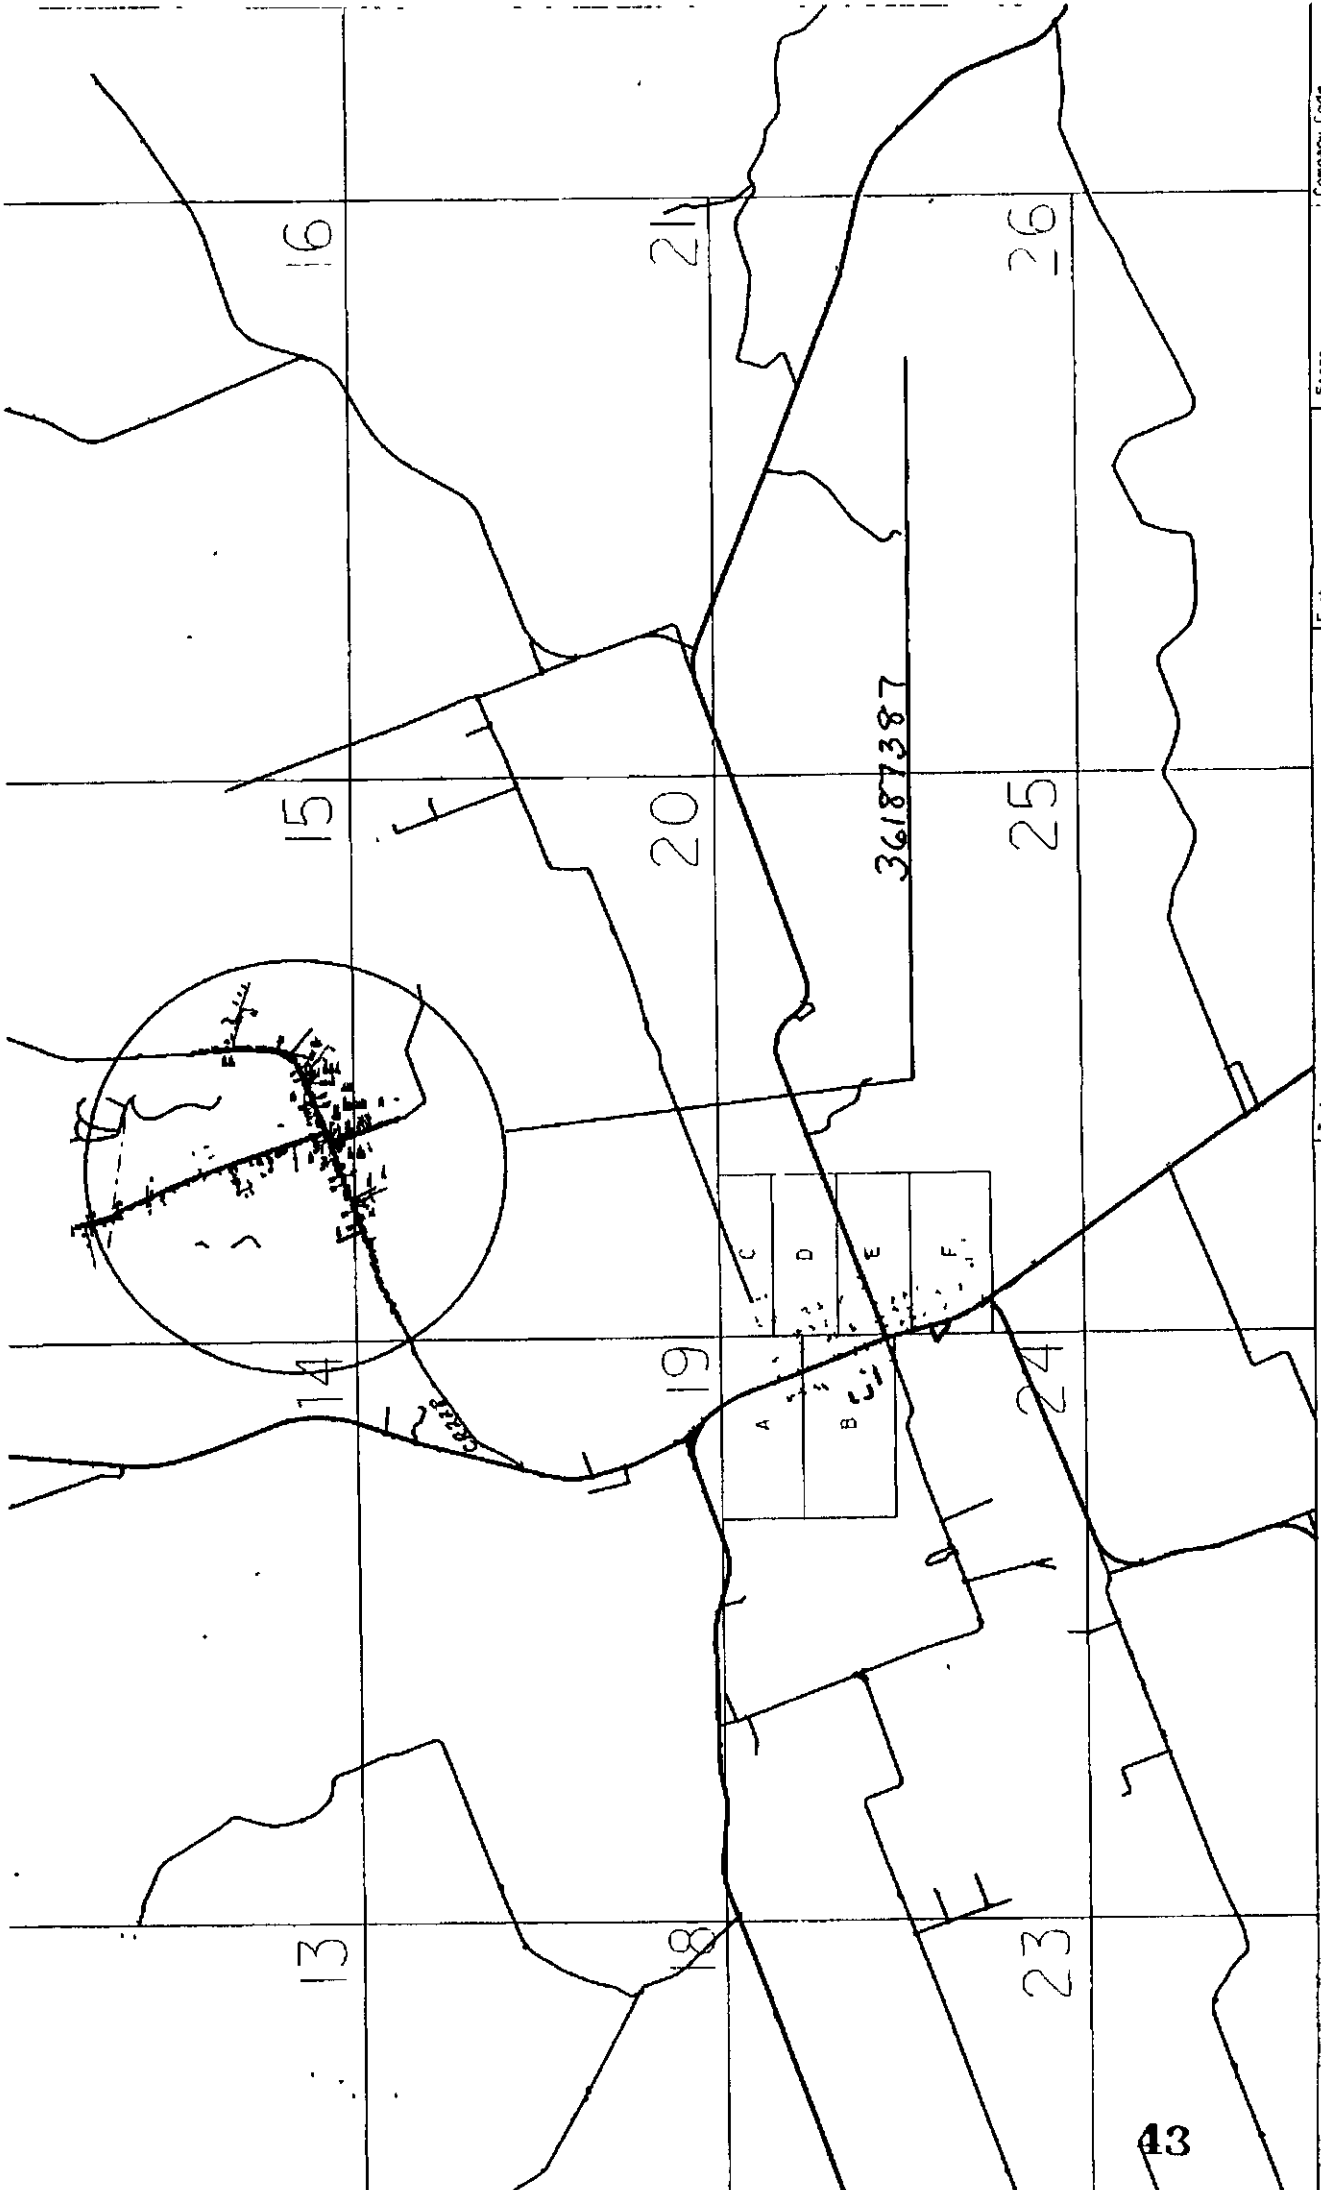

It is expressly understood that the said County Commissioners' Court does not imply hereby to grant any right, claim, title or easement in or upon this County Road, and it is further understood that in the future, should Williamson County, for any reason, need to work, improve, relocate, widen, increase, add to, decrease, or in any manner change the structure of this road or right-of-way, this line, if affected, will be moved at the direction of the Williamson County Engineer or County Commissioner. This installation work shall not damage any part of the roadway and adequate provisions shall be made to cause a minimum of inconvenience to traffic and adjacent property owners.

Williamson County
Unified Road System

When specifically agreed to in writing and signed by a Williamson County Commissioner, or the County Road Administrator, Williamson County will permit the cutting of a roadbed in lieu of core drilling, provided the contractor or contractors agree to the following installation:

SPECIFICATION FOR CUTTING ROADBED IN LIEU OF CORE DRILLING

1. Compacted base material with concrete cap.
2. The utility shall be placed a minimum of 30" below the flow line.
3. Layer compacted and topped with 3" hot mix asphalt.
4. A performance bond, or other securities agreed upon by the County, must be pledged in the amount of the estimated cost of the road repairs, as agreed to by the contractor and Williamson County, prior to the commencing of a cutting of the roadbed
5. A road cut permit fee, in the amount of \$120.00 per roadbed cut, must be submitted to the County Road Administrator's office prior to cutting the roadbed

SPECIFICATION FOR CUTTING ROADBED IN LIEU OF CORE DRILLING
WITHIN AUSTIN ETC

1. Roadbed cuts to be repaired in accordance with City of Austin specifications as outlined in their standard Specifications for Cuts in Public Right of Way Manual
2. The utility shall be placed a minimum of 30" below the flow line.
3. The installation to be free from defects for a period of one (1) year from completion date. Any maintenance required during this period, caused by the cutting of a road, will be done by the contractor or contractors without cost to the County
4. A performance bond, or other securities agreed upon by the County, must be pledged in the amount of the estimated cost of the road repairs, as agreed to by the contractor and County, prior to the commencing of a cutting of the roadbed
5. A roadbed cut permit fee, in the amount of \$120.00 per roadbed cut, must be submitted to the County Road Administrator's office prior to cutting the roadbed

This agreement must be entered into prior to the commencing of the cutting of a roadbed

1. Hot mix asphalt 1 1/2" min thickness. Roll in place to match existing surface. $\pm 1/8"$ tolerance.
2. Trench backfill shall be flexible base, compacted to 95% optimum in 8" layers unless otherwise approved and specified. Flexible base to match existing base thickness or 8 inches, whichever is greater (specifications: TSKD Item 248, Type A, Grade 2).
3. Pipe embedment (pipe envelope) size and materials shall be as specified elsewhere by the utility company and/or its engineers. Pipe depth shall be as specified elsewhere provided minimum depths are met.
4. Saw cut shall be made prior to ditch cut. If pavement is damaged during cut, a new saw cut shall be made beyond the damaged area and new pavement placed.
5. Where roadside ditches (bar ditches) are crossed by the utility pipe, minimum depth to the top of the pipe from centerline road elevation will be 36".
