 NANCY E. RISTER, County Clerk
 DAVID U. FLORES, County Auditor

AGENDA ITEM # 1January 5, 1999

*

Hear any interested person and consider forming the next agenda or adding items to today's agenda.

Jarrell area resident Roger Vogt requested installation of culverts on County Road 305 at Doublecreek where the Spear property is being flooded on both sides of the road. He is unable to access the property until the water drains off. The Spear Estate owns the property on both sides of Salado Creek for 3/4 of a mile.

County Road Superintendent Greg Bergeron and Engineer Assistant Mark Kronkosky advised the property is located within the defined 100 year flood plane. In order to install a culvert at the crossing which is flooding the county would be required to approach the United States of America to amend the flood plane map. This would require all the flood plane analysis being run again. If this were accomplished and a culvert was installed the possibility of causing the flood plane on the up-stream side of the crossing to be worse is highly likely.

Mr. Kronkosky advised Salado Creek flood flows with a magnitude of 30,000 to 40,000 thousand cubic feet per second in a very wide sweep. If the roadway embankment was built up and culverts installed we would have built a dam for upstream properties.

Mr. Vogt advised there was no access to the 2400 acres except over low water crossings.

Commissioner Hays advised two bridges would entail a tremendous expense to the county.

3

Mr. Vogt requested permission to install culverts on the property after he received approval from Paulo Pinto of the Williamson County and Cities Health District.

State Legislative lobbyist Robert Stluka discussed various bills which have been filed for this session of the Texas Legislature which begins on January 12, 1999.

Also Mr. Stluka advised he is awaiting a report from TNRCC containing a side-by-side analysis of the current versus proposed regulations on Edwards Aquifer interpretation.
