 DAVID U. FLORES, County Auditor

AGENDA ITEM # 1SEPTEMBER 21, 1999

Hear any interested person and consider forming the next agenda or adding items to today's agenda.

Oak Crest Estates resident Mr. Keith B. Peshak distributed photographs and discussed drainage and flooding problems on Bootys Road after a 2" rain in an hour and a half earlier this year. This subdivision is located within the extra territorial jurisdiction of the City of Georgetown.

Commissioner Hays advised Oak Crest Estates is an old subdivision located off Bootys Road which has always flooded. Construction has recently begun on Texas Traditions, a new subdivision, for which engineered construction drainage plans were approved and signed by the City of Georgetown and Williamson County. The water from the detention ponds is all released from one point. When the rain occurred all the water was released across Bootys Road and filled the natural low spots in the terrain. The one (1) house which was flooded was actually built in a dry creek which filled up with water.

County Engineer Joe England, City of Georgetown and the developers engineer advised digging drainage ditches on both sides of Bootys Road to route the water into the San Gabriel River down stream from this development. Box culverts have been ordered, Turtle Bend pipes have been up-sized and ditch digging began only to discontinue until the gas and water lines are moved.

As soon as the concrete dries the box culverts will be installed to carry the water from the 25 year storm and the rock hammer will be used to cut the ditches which should solve the flooding.

Commissioner Hays and the County Engineer have attended three (3) Homeowners Association meetings advising the situation and solution. The residents of Oak Crest are satisfied with the explanation and in agreement to patiently wait for the resolution of the problem.

Northridge Acres resident Kenneth Snyder advised his subdivision is without water. He was pleased with the trenching job accomplished by Williamson County which has solved the drainage problems.

Mr. Darrell Champeau of Cedar Park discussed Hog Farm Park which has been managed by the YMCA and is now open to the public.
