**VI. Fleet Maintenance**

## **Fleet Maintenance Overview 1999-2000**

Fleet Maintenance takes care of vehicles and equipment for twenty-three different departments. The total number of vehicles and equipment of record at this time is 576, with a purchase value of \$12,739,988.00. The largest of these departments is the Unified Road System with 275 units that have a new purchase value of \$7,559,043.00.

Fleet maintenance is performed, recorded and charged out to the departments at cost. The labor cost is calculated to include mechanics, shop expenses and administrative expenses. The current labor rate applied to repairs is \$29.00 per hour.

Using our cost as a base, the total maintenance performed was \$768,247.52. This breaks down as follows: \$383,086.37 for parts, \$350,262.64 for labor and \$34,898.51 on out-sourced repairs. There were 1,406 purchase orders requested and processed for the day to day operation of the shop. The fleet staff consists of seven mechanics, one tire/service technician, one paint and body technician, one shop foreman, one parts manager, one administrative clerk for accounts payable/receivable and the fleet manager.

Maintenance expenses for the Unified Road System, vehicles and equipment, was \$558,967.35. That's over half a million dollars spent to maintain the fleet, with a breakdown of \$304,496.30 in parts and \$254,471.05 in labor.

Fleet Maintenance provided fuel for the Unified Road System fleet. Our records show that, through our four fuel sites and seventeen trucks with fuel tanks, we used 378,324 gallons. That is 183,158 gallons of diesel and 195,166 gallons of unleaded gasoline. Besides the U.R.S. department, there are seventeen other departments, which accessed fuel from the fleet facilities. They used 121,654 gallons and were billed \$129,169.98 for that fuel. Through our fueling records, which are generated from the Tech 21 System and the fuel sheets turned in, we documented 68,812 gallons were used off road. This information was turned in to the State of Texas Comptrollers office for a fuel tax refund. The Texas Excise Tax reimbursement totaled \$13,762.40.

The fuel log sheets are very important, not only do they make it possible for a tax refund, they are the only source for current machine hours. The hour meter readings are used to track off road equipment for preventive maintenance.

On the subject of fuel, the new Tech 21 fuel site for the Taylor yard was completed this fiscal year. Dwight Russell and Associates provided the engineering on the project for \$9,000.00. They drew up the plans, specifications and prepared the bid packages for the facility. Working with the Auditor's office, they advertised for bid. There were three bidders and the low bid was Tecom U.S.T. Systems at \$77,826.40. During the process of obtaining permits with the City of Taylor it was determined that service at the Taylor yard was obsolete, inadequate for the current usage, and would need to be replaced to meet the

current code. It was also noticed that the three-phase service to the asphalt emulsion pump needed to be replaced. The total for building wiring was \$9,409.50. The total project cost was \$97,127.50

### **Vehicle Pre-Trip Inspection Report:**

These reports are reviewed when they are turned in and all of the reports on units listing problems are pulled. Depending on the problem, the foreman may be contacted to schedule a repair time. This process insures the unit was looked at before being operated and reduces the liability of the county in the operation of equipment and vehicles.

An emergency generator set was purchased for the central maintenance facility this fiscal year. It is an Onan Spark Ignited Natural Gas 35 KW Emergency Generator. The generator was purchased from Cummins Southern Plains in San Antonio for \$11,800.00. Contract electricians pulled the circuits for the fuel system, phone system, radio system, outside lights and building lights for the main lobby at the central maintenance facility. A new panel for the electrical circuits and an automatic switch gear was installed. The cost of the electrical work, parts and labor was \$8,147.99. The natural gas was plumbed to the unit and connected. The cost of natural gas, labor and materials was \$2,000.36. The total cost of the project was \$21,948.35

MEMORANDUM

*JME*  
Date: November 7, 2000  
From: Joe M. England, P.E.  
To: Greg Bergeron, Road Administrator  
Subject: Medium Range Departmental Plan

During the next three to five years I project that the engineering section of our department will continue to perform the same duties and responsibilities as we have in the past.

With the possible passage of the \$350,000,000.00 general obligation bond package, I see my responsibilities shifting more toward pure administration. Williamson County will need an overall program administrator to oversee the contract manager for the program. As Williamson County continues to grow and the federal process becomes more complicated, the possibility exist that Mark, who is already handling the technical review, would take over the complete responsibilities of the Williamson County floodplain administrator. Paulo would continue in his other duties as sanitarian. Attached is the revised staff diagram that reflects this potential.

Since my last medium range departmental plan we have obtained the pavement management survey which included volume counts on all county designated roads. It is now our responsibility to implement this into a maintenance program with the help of the Commissioners Court. Through CAPCO we are proposing to obtain updated digital orthographic aerial photos for all of Williamson County.
