

AGENDA ITEM 24

Discuss and take appropriate action to approve contract extension for JP #4 building.

Brad Thigpin, the project architect for the JP Pct. #4 building, Bob Space, and Joe Latteo addressed the Court. **County Attorney Gene Taylor** stated that the contract should be reviewed by George Powers (Auditor's Office) and then by the County Attorney's Office prior to the meeting of May 4, 2004.

Agenda Item 24 was moved to the agenda of the meeting of May 4, 2004.

Re: Justice of the Peace, Precinct Four
211 West 6th Street
Taylor, Texas 76574

Subject: Contract Time Delays

Dear Mr. Limmer:

We are summarizing the Contract Time Delays as requested for the Justice of the Peace, Precinct Four project located at 211 West 6th Street in Taylor, Texas 76574 as follows:

1. Rough Plumbing Work (Six Calendar Days)- The building pad was stopped on Wednesday, September 24, 2003 resulting from our inability to maintain a 1/4-inch slope per foot on wastewater piping due to the City of Taylor sewer pipe elevation in the alley. We were subsequently advised on Monday, September 29, 2003 by the plumbing engineer that a 1/8-inch slope would be acceptable without increase in pipe size and work continued on Tuesday, September 30. It was our intention to work over the week-end, if necessary, to maintain the construction schedule.
2. Exterior Brick (Twenty-One Calendar Days)- The execution of our work was delayed by the extended period of time necessary for exterior brick approval as indicated by the attached schedule:
 - November 14, 2004- Acme Brick Company Samples Submitted
 - January 5, 2004- Brick Sample Approval Including Accent Color.
 - January 19, 2004- Delivery of all Masonry Materials.

Note the entire project was practically brought to a complete stop due to the delay. We were unable to proceed with most interior finishes until the exterior brick and stucco was complete so the parapet metal flashing could be properly flashed and waterproofed. We reserve the right to make an additional delay claim associated with stopping and re-starting the project due to the brick approval delay.

3. Cold Weather (Five Calendar Days) as follows-
 - November 17 and 18 Delaying the Wood Framing Operation
 - January 5, 6 and 7 Delaying Exterior Grading and Portions of the Interior Finish Operations.

4. Cold and Rain Weather (Two Calendar Days)- February 12 and 13 Delaying the Brick and Stucco Operation.
5. Rain Weather (Thirty-Five Calendar Days Total) as follows:
 - a. Building Pad Work (Four Calendar Days)- Rain on Friday, September 12, 2003 stopped building pad work on the project and caused the select fill pit at Texas Crushed Stone in Georgetown to be closed through Monday, September 15. It was our intention to work over the week-end, if necessary, to maintain the construction schedule..
 - b. Asphalt Work (Seven Calendar Days)- The select fill base was installed and approved by the City of Taylor for asphalt installation on Friday, April 2. Rain from April 2 through April 6 partially washed out the select fill base. The select fill base was allowed to dry on April 7, repairs were made on April 8 and the asphalt was placed on April 9. The striping and handicap sign were installed over the subsequent weekend and the substantial completion date has been established as April 12, 2004. It was our intention to work over the week-end, if necessary, to complete the project.
 - c. Other Rain Delays (Twenty-Four Calendar Days)-
 - October 6 and 9
 - November 13,15,16 and 17
 - December 12 and 28
 - January 8,15,16, and 17
 - February- 4,5,9,10,11,24 and 25
 - March 1,3,4, 13 and 24

The current contract time extension request is for sixty-nine (69) calendar days, plus the time required for restarting the project due to the brick approval delay and time required for the various Change Orders. Please refer to the attached monthly reports from the Taylor Texas Weather Network for the Months of September, 2003 through April, 2004 and advise if there are any questions.

Sincerely,

Robert Daugherty
